A data model (or datamodel) is an abstract model that organizes elements of data and standardizes how they relate to one another and to properties of the real world entities. For instance, a data model may specify that the data element representing a car be composed of a number of other elements which, in turn, represent the color and size of the car and define its owner.

Data model - Wikipedia
Thanks to the Amazon Effect, fast and free delivery is the new normal, forcing other online sellers to keep up. However, there's one area of e-commerce where online sellers can still compete logistically with Amazon and big box players: delivery of oversized, larger-than-parcel items, such as furniture, sofas, armoires, mattresses, treadmills, and more.
