Classical mechanics describes the motion of macroscopic objects, from projectiles to parts of machinery, and astronomical objects, such as spacecraft, planets, stars and galaxies.. If the present state of an object is known it is possible to predict by the laws of classical mechanics how it will move in the future (determinism) and how it has moved in the past (reversibility).

The insane religious-fanatic Zionists who have been trying for years to start Armageddon have failed yet again in their latest attempt, this time in Syria. They now face serious repercussions, possibly starting with a revolution in France. Before we get into the details, letâ€™s remember what it is weâ€™re dealing with here. It is difficult [â€]
