gerd keiser optical fiber pdf

An optical fiber connector terminates the end of an optical fiber, and enables quicker connection and disconnection than splicing.The connectors mechanically couple and align the cores of fibers so light can pass. Better connectors lose very little light due to reflection or misalignment of the fibers.

Optical fiber connector - Wikipedia

Fiber-optic communication is a method of transmitting information from one place to another by sending pulses of light through an optical fiber.The light forms an electromagnetic carrier wave that is modulated to carry information. Fiber is preferred over electrical cabling when high bandwidth, long distance, or immunity to electromagnetic interference are required.
