Product design & development ebook - Faadooengineers

generally, "design" is a process for deliberately creating a product to meet a set of needs. Mobile app development requires both engineering design and product design. Engineering design focuses on physics, such as speed, mass and other performance measures while product design also considers user and consumers by asking what the user ...

1 Introduction to Design and the Concept Development Process

A product concept is an approximate description of the technology, working principles, and form of the product. The concept generation begins with a set of customer needs and target specifications. In most cases an effective team will generate hundreds of concepts, of which 5 to 20 will merit serious consideration.
