David Ogilvy famously wrote in his Confessions of an Advertising Man (1963) that "five times as many people read the headline as read the body copy". Does this hold true today? In 2008, a study found that users read only half the information on pages with 111 words or less. The article was short ...

Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.
